

Ψ

The diagram illustrates a network switch configuration. A central switch is connected to a server rack on the left and a storage unit on the right. A network interface card (NIC) is shown at the top, connected to the switch. A legend at the bottom explains the symbols used in the diagram.

Legend:

- ☒ : 100BASE-TX
- : 100BASE-FX
- (□□□□) : 100BASE-T4
- : 100BASE-SX

[illegible]

The diagram illustrates a network topology. On the left, a rack contains a switch with four ports, each connected to a server. On the right, another rack contains a switch with four ports, each connected to a server. A central switch is connected to both racks. A legend at the top shows symbols for ports, servers, and connections. A note at the bottom right indicates a specific connection point.
